HARI Story

The Hagen Avicultural Research Institute (HARI) was established in 1985 to study the captive breeding and maintenance of companion birds. At present the breeding colony houses over 350 pairs of more than 50 various parrot species, as well as other types of companion birds.

The Hagen Avicultural Research Institute (HARI) has gained a respected international reputation for its work in avian research, nutrition and husbandry. Research fields include disease control, pair bonding, nutrition and the influence of temperature, humidity and light cycles on breeding.

Introduction

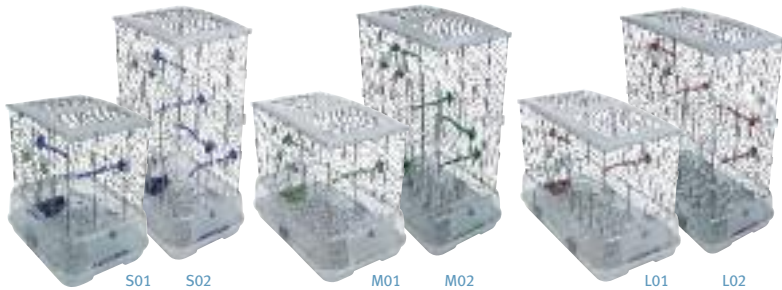

The VISION[®] Home for Birds continues the “less mess” tradition of bird cage design pioneered by the original VISION[®] Living Space for Birds.

As we all know birds, while making wonderful companions, can be quite messy. Their movements cause air currents which, in the case of most standard bird cages, cause waste, feathers and seed debris to be ejected from the cage and onto the floor.

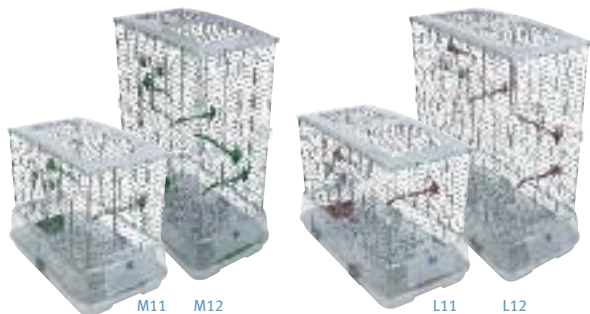

In the case of the VISION[®] Home for Birds, the combination of debris guard, deep base and the placement of the seed/water cups help combat air currents to keep the majority of the waste and debris inside the cage. This reduces the amount of mess and the time-consuming clean ups associated with bird keeping, leaving you more time to enjoy your pet.

VISION[®] Home for Birds are available in single home and tall home models, with each model available in Small, Medium and Large sizes.

Suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets

Suitable for Cockatiels and Lovebirds

Re-inventing the avian environment.

The majority of bird cages on the market today come equipped with a pull-out drawer. One of the disadvantages of a pull-out drawer is that often the drawer itself is smaller than the cage base. This means that the bird waste often misses the drawer, dropping on to the base, thus forcing the consumer to dismantle the cage in order to clean the base as well as the drawer – often a time-consuming and messy process.

With the Vision[®] Home for Birds – we’ve eliminated the drawer. The “no drawer” cage design simplifies cage cleaning – just detach the cage portion from the base portion and empty the contents of the base into the waste bin.

**SIMPLE, EASY,
SNAP-FIT ASSEMBLY**
• no screws, hooks
or tools required

1. UNIQUE BASE = LESS MESS

- the combination of debris guard, deep base and placement of the seed/water cups help retain waste inside the cage

2. DEEP BASE DESIGN

- accommodates multiple types of litter
- raised ridges on inside of base provide air circulation; helps prevent mildew

3. DOUBLE COMPARTMENT SEED/WATER CUP

- double compartments for a variety of feeding options
- can be used for either food or water

4. EXTERIOR SEED/ WATER CUP ACCESS

- allows non-invasive access, reduces stress to bird during maintenance

5. MULTI-GRIP PERCHES

- promotes circulation and helps prevent foot problems
- exterior perch access, reduces stress to bird during maintenance

6. 2-STEP CLEANING PROCESS

- Vision’s “no drawer” design simplifies cleaning
- cage detaches from base for fast, easy maintenance

7. DOUBLE PIVOTING FRONT DOORS

- pivot inwards at 90° angle
- allows versatile positioning

Cage Models

The VISION® Home for Birds is available in single home and tall home models, with each model available in Small, Medium and Large sizes.

The VISION® Home for Birds is suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets (Models S01, S02, M01, M02, L01, L02) and for Cockatiels and Lovebirds (Models M11, M12, L11, L12).

VISION® S01 Small Home for Birds

Suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets

ART. 83200

INCLUDES:

(2) Blue Seed/Water Cups, (2) Waste Shields,
(2) Blue Perches

CAGE DIMENSIONS:

18"L x 14"W x 20"H (45.5 cm x 35.5 cm x 50 cm)
Horizontal wire: 1.6 mm
Vertical wire: 2.6 mm
Wire spacing (center to center): 12.3 mm

ART. 83210

VISION® S02 Small Home for Birds (Tall)

Suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets

INCLUDES:

(2) Blue Seed/Water Cups, (2) Waste Shields,
(4) Blue Perches

CAGE DIMENSIONS:

18"L x 14"W x 33.25"H (45.5 cm x 35.5 cm x 84.5 cm)
Horizontal wire: 1.6 mm
Vertical wire: 2.6 mm
Wire spacing (center to center): 12.3 mm

VISION® M01 Medium Home for Birds

Suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets

ART. 83250

INCLUDES:

(2) Green Seed/Water Cups, (2) Waste Shields,
(2) Green Perches

CAGE DIMENSIONS:

24"L x 15"W x 20.5"H (61 cm x 38 cm x 52 cm)
Horizontal wire: 1.6 mm
Vertical wire: 2.6 mm
Wire spacing (center to center): 12.3 mm

VISION® M02 Medium Home for Birds (Tall)

Suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets

ART. 83255

INCLUDES:

(2) Green Seed/Water Cups, (2) Waste Shields,
(4) Green Perches

CAGE DIMENSIONS:

24"L x 15"W x 34.5"H (61 cm x 38 cm x 87.5 cm)
Horizontal wire: 1.6 mm
Vertical wire: 2.6 mm
Wire spacing (center to center): 12.3 mm

ART. 83300

VISION® L01 Large Home for Birds
Suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets

INCLUDES:
(2) Terra Cotta Seed/Water Cups, (2) Waste Shields,
(2) Terra Cotta Perches
CAGE DIMENSIONS:
29.5" L x 15" W x 21.5" H (75 cm x 38 cm x 54.5 cm)
Horizontal wire: 1.6 mm
Vertical wire: 2.6 mm
Wire spacing (center to center): 12.3 mm

ART. 83260

VISION® M11 Medium Home for Birds
Suitable for Cockatiels and Lovebirds

INCLUDES:
(2) Green Seed/Water Cups, (2) Waste Shields,
(2) Green Perches
CAGE DIMENSIONS:
24" L x 15" W x 20.5" H (61 cm x 38 cm x 52 cm)
Horizontal wire: 2.6 mm
Vertical wire: 3.0 mm
Wire spacing (center to center): 20.5 mm

ART. 83305

VISION® L02 Large Home for Birds (Tall)
Suitable for Budgies, Canaries, Finches, Lovebirds and Parrotlets

INCLUDES:
(2) Terra Cotta Seed/Water Cups, (2) Waste Shields,
(4) Terra Cotta Perches
CAGE DIMENSIONS:
29.5" L x 15" W x 36.5" H (75 cm x 38 cm x 92.5 cm)
Horizontal wire: 1.6 mm
Vertical wire: 2.6 mm
Wire spacing (center to center): 12.3 mm

ART. 83265

VISION® M12 Medium Home for Birds (Tall)
Suitable for Cockatiels and Lovebirds

INCLUDES:
(2) Green Seed/Water Cups, (2) Waste Shields,
(4) Green Perches
CAGE DIMENSIONS:
24" L x 15" W x 34.5" H (61 cm x 38 cm x 87.5 cm)
Horizontal wire: 2.6 mm
Vertical wire: 3.0 mm
Wire spacing (center to center): 20.5 mm

ART. 83310

VISION® L11 Large Home for Birds

Suitable for Cockatiels and Lovebirds

INCLUDES:
 (2) Terra Cotta Seed/Water Cups, (2) Waste Shields,
 (2) Terra Cotta Perches

CAGE DIMENSIONS:
 29.5"L x 15"W x 21.5"H (75 cm x 38 cm x 54.5 cm)
 Horizontal wire: 2.6 MM
 Vertical wire: 3.0 MM
 Wire spacing (center to center): 20.5 MM

ART. 83315

VISION® L12 Large Home for Birds (Tall)

Suitable for Cockatiels and Lovebirds

INCLUDES:
 (2) Terra Cotta Seed/Water Cups, (2) Waste Shields,
 (4) Terra Cotta Perches

CAGE DIMENSIONS:
 29.5"L x 15"W x 36.5"H (75 cm x 38 cm x 92.5 cm)
 Horizontal wire: 2.6 MM
 Vertical wire: 3.0 MM
 Wire spacing (center to center): 20.5 MM

Night Covers

A complete line of VISION® Night Covers, specially designed to fit the VISION® Home for Birds, is also available.

VISION® Night Covers are made from a washable, light-weight fabric and attach to the cage with velcro – not drawstrings – for added safety. The front flap can be opened separately, providing the bird with shade or protection against drafts, while still allowing an open viewing area.

VISION® S01

Cage Accessories

Bring a touch of nature indoors with the VISION[®] line of cage accessories. These garden-themed cage accessories are suitable for VISION[®] small-wire cages (as well as most standard, small wire cages)

VISION[®] NESTING DISC

For Canaries and Finches ART. 83060
Fits Vision[®] models 100/110/210/S01/S02/M01/M02/L01/L02

- 100% Natural Fibre
- For nest lining, nest building
- Wide openings for easy access

VISION[®] BIRD PACIFIER

For Budgies, Canaries and Finches ART. 83062
Fits Vision[®] models 100/110/210/S01/S02/M01/M02/L01/L02

- 100% Natural Sisal Fibre
- Helps prevent feather plucking and chewing
- Provides diversion, helps alleviate boredom
- Pacifier refill included

VISION[®] PLANTER

ART. 83070
Fits all Vision[®] cage models

- Attractive accent piece
- Deep-bucket design with “perch” handle
- Versatile pedestal base

VISION[®] DAISY PERCH

For Canaries and Finches ART. 83072
Fits Vision[®] models 100/110/210/S01/S02/M01/M02/L01/L02

- Multi-level, spring-designed perches
- Ergonomic “petals” for gripping comfort
- Two-tier treat holder and feeder
- Optional locking clip (for use on wire base cages)

VISION[®] BUTTERFLY MIRROR PERCH

For Budgies ART. 83074
Fits Vision[®] models 100/110/210/S01/S02/M01/M02/L01/L02

- Encourages a bird's natural curiosity
- Provides interactive stimulation
- Keeps pet entertained for hours

VISION[®] SUNFLOWER NEST HOLDER

For Canaries and Finches ART. 83076
Fits Vision[®] models 100/110/210/S01/S02/M01/M02/L01/L02

- Safe and cozy nesting site
- Multiple, secure-hold grips keep nest firmly in place
- “Petal” perches provide roosting comfort
- Two-tier treat holder and feeder
- Optional locking clip (for use on wire base cages)

VISION[®] BIRD BATH

For Budgies, Canaries and Finches ART. 83380
Fits Vision[®] models 100/110/210/S01/S02/M01/M02/L01/L02

- Clear, plastic hood
- Textured, anti-slip base
- Installs easily on cage
- Snap-Fit assembly

VISION[®] BREEDING BOX

Budgies, Lovebirds and Parrotlets ART. 83385
Fits Vision[®] models 210/S01/S02/M01/M02/L01/L02

- Roomy nesting area
- Clear-view plastic window
- Installs easily on cage
- Includes multi-grip perch

Nutrition to last a Lifetime

Tropicana is easy-to-eat and easy-to-serve. Formulated for overall body health, each pellet contains a healthy blend of grains, seeds, vegetables, fruits, proteins, vitamins and minerals.

Tropicana offers optimum diet for various bird species allowing you to feed your bird the exact levels of protein, fat, fiber and other essential nutrients they require. Tropicana pellets are completely edible, therefore less likely to end up scattered over your floor or the cage bottom. Tropicana is so nutritionally advanced that there's no need for dietary supplements. Tropicana was developed at the Hagen Avicultural Research Institute (HARI) and long-term research at (HARI) shows that birds fed on Tropicana maintain healthy weight levels and grow better plumage.

Essential Nutritional Benefits:

Fatty Acids

- Provides healthy skin/feather growth structure, vivid colors and luster.

Minerals

- Promotes healthy bones and colorful feather growth structure.

Vitamins

- Builds the immune system and proper growth development.

Protein Essential Amino Acid

- Provides building blocks for skeletal and muscle formation.

Carbohydrates

- Ensures a full, energetic and healthy life.

Tropimix

A Healthy, 100% Edible Mix – Free of husks and shells

Owning a companion bird can be a satisfying experience, Tropimix knows that one of the most important elements in keeping your bird healthy is proper nutrition. We all know that an Extruded diet like Tropimix is the best choice. However, birds, like humans, seek the enjoyment of eating different foods. In the wild, birds will eat a wide variety of seeds to get a balanced diet and Tropimix offers the best of both worlds. Tropimix is a healthy 100% edible multi-grain, fruits, vegetables with added Tropicana, giving your bird every possible advantage for a healthier happier life. Tropimix contains a carefully chosen selection of the finest human grade quality ingredients available.

Essential Nutritional Benefits:

- Contributes to clear vision, a responsive central nervous system and a healthy respiratory tract.
- Provides essential vitamins and amino acids required for feather structure growth, vivid colors and luster.
- Builds the immune system by stimulating blood and vascular systems and organ functions.
- Contributes to healthy epithelial tissue of the feet, mouth, gastrointestinal tract and reproductive system.
- Ensures optimum growth, provides building blocks for skeletal and muscle formation.

Hagen VME

Over the years, Hagen seeds have become favorites among bird owners.

The safe, effective Co2 (carbon dioxide) treatment of every bag also eliminates insect problems, without harmful chemical contamination.

Hagen Freshness begins with the high-quality products we put in our air-barrier bags. Seeds specifically grown for pet birds to the highest standards, and mixed according to years of applied research and experience. A complete selection of seeds and treats for birds of all kinds.

With traditional seed mixes, birds tend to become picky eaters, often selecting only one or two favorite seed types out of a seed mix. This may lead to an inadequate diet. Hagen Vitamin and Mineral Enriched Seeds (VME) not only offer a variety of fresh seeds, they also provide favorite seed kernels (hulled seeds) that are coated with important VME nutrients. As birds consume these familiar morsels, they receive extra vitamins and minerals.

Provides extra vitamins and minerals needed for excellent health

- Vitamin and mineral-enriched hulled seeds are a favorite among parakeets
- Air barrier bag seals in freshness; keeps insects out, helps maintain vitamin potency

*Traditional see mixes like Hagen food require the use of Prime Supplement.

Living World Premium

Living World Premium Food is a premium seed mix that contains assorted exotic seeds, nuts, naturally grown fruits and vegetables, with added Tropicana Granules. The Living World Premium food provides tasty selections of the

finest seeds and nuts birds would forage in the wild. It can be a good diet base when combined with the appropriate fresh fruits and vegetables. Traditional mixes like Living World Premium Food require the use of Prime Supplement.

Fresh Greens and Fruits

Birds can get natural vitamins from fresh greens and fruits. Celery, broccoli, spinach, romaine lettuce, endive, orange slices, fresh corn, carrot tops, clean dandelions, clover and chickweed are favorites among cockatiels, budgies, lovebirds, canaries and finches. Larger birds also enjoy these items along with other fresh foods such as apples, berries, pomegranates and grapes. Wash thoroughly before feeding.

These foods are all excellent vehicles for Prime vitamin and mineral supplement. Just sprinkle lightly before offering.

Fresh greens and fruits don't cause diarrhea but can create polyuria (excess water excretion) due to high water content. This is not harmful to the bird.

Remove all uneaten fresh food.

Supplements

PRIME

Prime is a complete dietary supplement that can produce advanced support in stressful situations. Prime contains lysine and methionine that are essential during feather replacement (moulting).

It can be used in drinking water, but is preferred on food. Prime easily penetrates or coats foods such as fruit slices, greens, egg food, small seeds and spray millet.

Prime delivers 14 vitamins, extra antioxidant vitamins such as C & E, trace minerals such as iodine, and essential minerals such as calcium. Prime is one of the highest calcium supplements available. Special beneficial bacteria help lower the pH of the digestive tract and may help suppress the growth of harmful organisms.

Prime is based on a phosphorus-free, naturally sweet calcium source (calcium gluconate). Calcium deficiency is one of the most common and serious nutritional problems of pet birds. Many ordinary vitamin supplements contain no calcium and use cheaper carriers such as sugar, which adds little to the supplement's potency.

Living World Cuttlebones

A bird's beak grows continually, it must be worn down through regular use or it will create problems. In addition to being an excellent source of minerals, Cuttlebones and Mineral Blocks provide a convenient way to help birds keep their beaks trimmed.

Iodine deficiency is common and serious in pet budgies. Iodine Block provides iodine dietary supplements and should be made available to all budgies. Cuttlebones and mineral blocks are great calcium and mineral sources.

Living World Spray Millet

Companion birds will benefit from having Spray Millet as part of their diets. Nutritious and delicious, this irresistible treat will please all small companion birds. This all natural millet is freshly harvested from wild and does not contain any additives. Spray Millet should be introduced when bringing a new bird home.

It will be the first food a hungry bird will eat regardless of other food present in the cage- Ideal for: growing nestlings, young birds, breeding or moulting adult birds. Spray millet and honey sticks encourage birds to work for their food, promoting natural foraging behavior. Plus, as any bird owner can tell you, birds love these items!

- Fresh Picked
- 100% natural treat
- Use during breeding or moulting
- For all caged and outdoor birds.

Living World Treats

Honey Sticks feeding methods simulate natural feeding patterns found in native habitats. Each treat contains only the finest selected ingredient and has been molded into a stick.

- Excellent for feeding and chewing exercise
- Honey, lecithin and essential minerals help keep a balanced diet
- Provides high energy and nutrition

Hagen Grit and Seed Treats

HAGEN TREAT MIX contains only the highest quality seeds blended expressly for the nutritional needs of birds. All seeds are specially selected for high nutrition and taste appeal. They are air cleaned and then polished to ensure a dust free, appetizing mixture eagerly sought by birds.

Some birds instinctively know that some trace minerals are found in naturally occurring grits. Since parrot-type birds remove the seed shells, they probably require little grit-based grinding action as their gizzard seems more than able to handle the job even without any grit. Pet doves, quail and pigeons require grit because they do not shell their seed. Many pet birds do not get all the minerals they need, so periodically offer small amounts of a mineral grit substance such as Oyster Shell. This hard grit is an excellent source of calcium.

Seed treats add variety and interest to a regular diet. They should be alternated to provide different nutrients and textures. Birds on a Tropicana diet should be hand fed small amounts of seed treats.

Health Care

Wash your hands before and after handling birds. Maintain a routine cleaning schedule. Keep all food and water containers clean, wash daily if possible. Throw out any containers, toys or utensils that are cracked, badly scratched or chipped.

Keep perches clean and replace regularly. Store bird seeds in airtight containers in a cool, dark place. Be careful about exposing pet birds to other birds (i.e. during boarding or grooming) and use caution when introducing new birds. Talk to your veterinarian about a quarantine period.

Pet bird care should be a shared family responsibility.

- Ask your pet shop retailer about the best species for your lifestyle.
- A bird cage should be spacious, secure, and cleaned frequently.
- Always have fresh food and water changed daily.
- Keep bird cages in a safe location, away from dangers such as direct sunlight, kitchen fumes, cold temperatures and predators.
- Secure your home from any potential dangers before letting your bird fly around freely; always monitor its flight.
- Never chain down a bird—clipping flight feathers is a safe and humane way to prevent pet birds from escape or injury.
- Know your bird—any change in normal behavior could be a sign of illness.
- If your bird's beak, wings or nails require trimming, let a veterinarian or avian expert show you how to do it first.
- Most birds, especially very young ones, need attention; take the time to play with them.
- Plain seed mixes can lead to obesity as well as deficiencies in calcium and vitamins. Try to feed your bird formulated diets or at least provide nutritional seed supplements.
- Birds should visit the vet at least once a year.
